

Simply Connected.

There are endless possibilities when it comes to designing a PA for a fixed space. However, sometimes a room must be a meeting space one day, a conference room the next, and simply be available for any function the next. That's when it can be a real challenge to create a system that is as flexible as the space is without compromising on sound quality.

ConferenceONE is a complete PA system with hassle-free setup, absolutely consistent intelligibility, and total freedom from feedback in any configuration. It conveniently combines in each console Shure's patented IntelliMix® automatic mixing technology with everything you need in a system— Microflex® gooseneck mics, mixer, amp, high-quality loudspeakers.

All you have to do is plug it in.

C1-Ci Chairman Unit

- Easy, fast, flexible setup
- Complete system integration
- Automatic and push-to-talk modes
- Shure audio quality and reliability
- Two systems:
 - ConferenceONE Standard
 - ConferenceONE with IntelliMix™

C1-PS 60i Power Supply

One of many possible setup diagrams: Panel with audience interaction and phone-in

Other Features

- Chairman unit controls system volume, priority and cancel functions
- Telescoping fold-out Microflex® microphone in each unit
- Red LED light ring indicates activated microphones
- Quick daisy-chain connection via Neutrik® connectors
- Headphone jack with volume control on each unit
- Input and output volume and mute controls
- AEC/Telco interface connection
- SCM mixer link input to connect and control additional automixed microphones (via SCM810 or SCM410)
- Optional Rental Case for storing and transporting a complete 20-channel system

Shure's IntelliMix®

Featured in ConferenceONEi systems

Prevents False Triggers by quickly distinguishing between background noise and speech for each input.

Delivers Clear, Natural Audio by turning on only the best microphone for each speaker.

Eliminates Ambience Dropouts, ensuring that there is always some ambience present even when no one is speaking.

Ensures System Stability with No Feedback by automatically maintaining a consistent output level even as more mics are opened.
